

Assignment 1 - Hosting your Website

Part -B Answers

1. https://faseem619.github.io/Webp_17/
2. GitHub pages is a static web hosting service which runs the HTML, CSS and JavaScript files from GitHub repositories and publishes a website.
3. Static content is any content that can be delivered to an end user without having to be generated, modified, or processed. In Dynamic Websites, Web pages are returned by the server which are processed during runtime meaning they are not pre-built web pages but they are built during runtime according to the user's demand.
4.
 - a. Select a Web Hosting Provider
 - b. Register a Domain Name
 - c. Configure Your Package Options
 - d. Install backend servers like Apache or Nginx
 - e. Install database server like MySQL
 - f. Host your website
